

DEC SELECTS NOISE CONSULTANT

5/18/2009

The DEC received three responses for its Request for Proposals for a noise consultant to provide services to characterize noise sources emanating from Evergreen Solar's Devens facility and to propose mitigation measures to bring the facility into compliance with 974 CMR 4.05 of the DEC's Rules and Regulations dealing with Industrial Performance Standards for Noise. The DEC received proposals from three excellent firms, Cavanugh and Tocci Associates; Epsilon Associates; and Modeling Specialties. After a thorough review of the responses, the DEC has selected Modeling Specialties of Westford to fulfill the proposal requirements.

The consultant has been authorized to proceed in as expeditious a manner as possible.
